## OPTIONS AND COMBINATIONS IN PRODUCTION ARE COUNTLESS:

- ↑ Top quality fabrics - POLYESTER PONGEE
- ↑ Nano coating, teflon coating and UV protection
- ↑ 5 types of mechanisms: manual opening, automatic opening, automatic opening / closing, „jumbomatic“, „windproof“
- ↑ Various models of basic constructions ("frames")
- ↑ Different umbrella frame shaft thickness
- ↑ Almost endless selection of umbrella handles with possibility of personalization
- ↑ Various diameter dimensions (97 - 137 mm)
- ↑ over 25 standard colors of monochrome fabrics
- ↑ 3 visual application technologies (hand-painting, screen printing, sublimation)
- ↑ Oeko tex 100 label
- ↑ GRS and rPET label
- ↑ 3D visualization
- ↑ Personalization, on-line personalization with direct ordering, collaboration with designers, celebrities and influencers.
- ↑ ON-LINE CONFIGURATOR

***Also, it is possible to develop a completely unique design according to customer's wishes!***

# BASIC PARTS OF AN UMBRELLA

## NANO-COATED FABRIC

*The fabric with nano-coating sets new standards in the umbrella industry by offering ultimate protection. Specific treatment allows water to be completely repelled from the surface of the fabric, leaving it dry after each use, ensuring protection against leakage and moisture retention.*

*Resistance to abrasion makes this fabric an ideal choice for all weather conditions, providing long-term value and reliability. Whether it's for everyday use or special occasions, nano-coated fabric guarantees superior protection.*

*In addition to exceptional water resistance, the fabric is suitable for screen printing, allowing for personalization and customization according to customer requirements. This fabric is the ideal solution for those seeking top-notch functionality with the option of personalization.*

RECYCLED FABRIC

# RAISED FROM THE WASTE

## RECYCLED FABRICS

Recycled PET (rPET) is a high quality polyester fiber made from 100% recycled PET plastic bottles. By producing rPET fabric, we consume less energy. The amount of waste during the production of the product is reduced to a minimum, which is one of the goals of modern production. Recycled fabrics made of plastic bottles is also used for sublimation.

This fabric is labeled OEKO-TEX® Standard 100 and GRS, and is also an environmentally friendly material because its use reduces plastic production and recycles old plastic. In this way, we clean our land and sea and contribute to the preservation of natural resources. It is important to reduce waste, reuse and recycle as much as possible to save our planet!

Reminder - our black handles are also made from recycled material.  
We produce them from recycled acetate cellulose granules.

**DOUBLE-SIDED**

**"MAGIC" FABRIC**

## **"MAGIC" FABRIC**

*Introducing our revolutionary umbrella fabric, designed to transform every umbrella into a work of art when it gets wet. In its dry state, this fabric is monochrome and subtle, perfect for a classic look. However, when it becomes wet, the fabric comes to life, revealing hidden patterns that only appear upon contact with water.*

*This fabric is the result of innovative technology that enables the design on the material's surface to change when exposed to water. Such a feature turns the umbrella from just a practical item into a dynamic accessory that responds to weather changes.*

*Made to withstand various weather conditions, this fabric is durable and long-lasting, ensuring that the umbrella remains functional and attractive over many seasons.*

8

## **DOUBLE-SIDED FABRIC**

*The double-sided fabric brings innovation in design and functionality. On one side, the fabric is solid-colored with a metallic finish, providing an elegant and sophisticated look. Users can choose from various colors that have this metallic effect, allowing them to customize the appearance of their umbrella to their preferences. Additionally, simpler prints can be added to this side of the fabric, enabling further personalization.*

*On the other side of the fabric, we offer the possibility of complete personalization. This side can be used for printing an entire photograph or another design of the user's choice, giving them the opportunity to make their umbrella unique. Alternatively, this side can remain white, offering a clean and classic look.*

## CERTIFICATES

### HANDLES AND PIPING PERSONALIZATION

*The Global Recycled Standard (GRS) is a voluntary product standard for tracking and verifying the content of recycled materials in a final product. The standard applies to the full supply chain and addresses traceability, environmental principles, social requirements, chemical content and labeling.*

*OEKO-TEX® certified products comply with the requirements that guarantee that OEKO-TEX® marked textiles are harmless to human health and the environment. This certificate regulates the amount of permitted substances and prohibits the use of harmful and carcinogenic substances, allergenic pigments, harmful hardeners and acids, chlorine, tin and heavy metals, acids and pesticides*

## HANDLES PERSONALIZATION

*Certain models of the handles of our umbrellas have the possibility of labeling. Point up your logo or slogan and be classy. We offer two types of personalization on handles. Personalization by printing and personalization with a special silicone sticker. Look for the icon!*

## PIPING

*Use piping to show your logo in elegant and special way.*

## WOODEN FRAME

*Discover classic elegance with our wooden umbrella frame. This frame combines traditional aesthetics with modern craftsmanship, creating an umbrella that is not only functional but also stylishly expressive.*

*With a 14mm wooden shaft and metal end caps, this frame provides durability and stability, making it ideal for use in various weather conditions.*

*The wooden curved handle adds sophistication, while the metal tips and cap ensure longevity and resistance. Perfect for those who appreciate classic design and quality, the wooden umbrella frame is an ideal choice.*

COMING SOON!

**TORNADO UMBRELLA**

*Let storms never catch you off guard again!  
The weather may be unpredictable, but your  
umbrella doesn't have to be. Tornado has your  
back through light drizzles to raging storms.  
Dependable, stylish, and indestructible.*

**COMING SOON!**

**CARBON FIBER UMBRELLA**

*Made from carbon fiber, it offers maximum wind resistance with minimal weight. The perfect blend of strength, elegance, and*

*practicality - for every day, in any storm.*
